

WE CONNECT DEVELOPMENT WITH ENGINEERING

LCA and sustainability management

Our LCA and sustainability department is happy to support you in implementing your sustainability strategy with the following services:

- ✓ Determining the PCF and CCF (with corresponding CO₂ declaration) - measures to reduce emissions
- ✓ Performance and efficiency assessment of machinery and equipment

www.cetex.de

Other services

Support and advice on

- ✓ Questions regarding the Supply Chain Due Diligence Act and supply chain management
- ✓ Questions about the development/implementation of a sustainability management system
- ✓ Measures to increase sustainability and to implement a circular economy (technical and organisational)
- ✓ Measures to improve resource efficiency and to reduce emissions (generation of corresponding R&D projects)
